30 of the Most Innovative New Products from EMS Today

By Jeff Lindsey, PhD, EMT-P

Every year, *JEMS* showcases imaginative, ingenious EMS products that have been released in the past six months. This March, the 10-member, *JEMS* product review team spent three days combing the exhibit hall at the 23rd annual EMS Today Conference and Exhibition in Philadelphia. The team, comprising seasoned field providers, educators and EMS procurement specialists, met with more than 200 exhibitors, reviewing products recently introduced to our industry and asking about product design, rationale, function and practical application for prehospital medicine.

A vast array of products was introduced for the first time at EMS Today, offering attendees a first-hand look at new devices, educational materials, uniforms and vehicles designed to help them do their work in a safe, expeditious and clinically sound manner. Feast your eyes on these ...

< Safe, Efficient Oxygen Cylinder Filling Station

Oxygen Generating Systems Inc. (OGSI) introduced the CFP-15 Oxygen Cylinder Filling Station at EMS Today. The system automatically refills the oxygen cylinders of a cascade system for continuous availability. The ease of use and ability to generate its own oxygen without the reliance on outside contractors impressed the review team.

> For more information, contact Oxygen Generating Systems at 716/564-5165, via e-mail at jestrada@ogsi.com or online at www.ogsi.com.
