**Audubon Machinery Corporation
Meets Job Creation Target Early**

As part of an incentive package provided by the Niagara County Industrial Development Agency and the Lumber City Development Corporation in 2005, Audubon Machinery Corporation pledged in 2005 to create 25 new positions by the end of 2008.

We are proud to announce that we have met that job creation target 6 months early. Positions were created in Management, Engineering, Sales, and Production (Welders and Assemblers). The business is thriving and Audubon expects to continue to add more jobs by the end of the year.

Audubon Machinery Corporation is a diversified manufacturing company with its headquarters and production facility located in North Tonawanda, NY. Its 42,000 ft² building was the first factory in New York State to be given a "Green Building" Certification by the USGBC (United States Green Building Council) in 2007. Additional information on our products and positions available within the company can be found on our websites at: www.ogsi.com and www.schlyermachine.com.
